PRELIMINARY AMENDMENT

Prior to examination, please add the following new claims.

17. (New) A method of reproducing one or more multimedia streams at a local end device in accordance with a user-specified quality of service, comprising:

receiving one or more multimedia streams from respective remote end devices;

determining whether a quality of service for one or more of the received multimedia streams is less than the user-specified quality of service; and

after determining that a quality of service for one or more of the received multimedia streams is less than the user-specified quality of service, transmitting to a selected remote end device a request for a bit rate control operation to be performed at the selected remote end device.

18. (New) The method of claim 17, wherein the bit rate control operation request includes a set of quality of service parameters.

19. (New) The method of claim 18, wherein the set of quality of service parameters includes a specification for a minimal quality of service for the multimedia stream supplied by the selected remote end device to the local end device.
